[1] Morocco's aerospace industry has witnessed strong growth over the past two decades. In 2024, exports in aerospace industry exceeded 30 billion dirhams, which is a 15% increase compared to 2023. This growth is the result of two main factors: Morocco expanded its export markets beyond Europe to the United States and Asia, and production increased in major industrial zones such as Casablanca Midparc and the Tanger Free Zone.

[2] This development is the result of long-term planning under the Industrial Acceleration Plan (PAI) since its launch in 2014. Today, the industry employs more than 25,000 people. Local, specialized training institutions, such as the Institute of Aeronautical Professions (IMA), have played a major role in preparing skilled workers. More than 38% of the workforce is now highly qualified thanks to the diverse training programs.

[3] In February 2026, King Mohammed VI launched the establishment of a new Safran Group factory in Nouacer. The factory is specialized in producing aircraft landing gear systems. Safran has been present in Morocco for 26 years now, and employs about 5,000 people in 10 different factories; 70% of the employees are women. The investment in this new project is expected to exceed 280 million euros and will create around 500 direct jobs. The factory will operate entirely on carbon-free energy, in line with Morocco's environmental and green industries policy.

[4] Ryad Mezzour, Minister of Industry and Trade, emphasized that the partnership with Safran has helped transfer expertise in aerospace industry, develop local skills, and strengthen Morocco's role in **this field**. The strategic location of Morocco will allow Safran to meet growing global demand for aircraft and bring production closer to European manufacturers such as Airbus and Boeing.

[5] To reduce its dependence on traditional sectors such as agriculture, Morocco is developing a network of high-technology industries. The aerospace sector creates high-skilled and stable jobs, encourages technology transfer, and supports the growth of local enterprises. "We warmly thank the Moroccan government for supporting these major industrial projects. By strengthening its presence in **the country**, Safran demonstrates its commitment to developing the Moroccan aerospace industry," said Safran CEO Olivier Andriès.

Model answers (any appropriate answer is accepted)

Task 1: I'm planning to start my own business in the future. The business I want to have is an online shop that sells handmade Moroccan crafts to customers around the world. I am interested in this business for different reasons. First, I love our traditional art and I want to help local artisans earn a fair income. Second, an online business needs a small investment at the beginning, so it is easier for a young person to start. Finally, I would like to be my own boss, make my own decisions and create jobs for other young people in my city.

Task 2: Dear Sir/Madam, I am writing on behalf of the students of our school to talk about the challenges we face in our school clubs. First of all, many clubs do not have enough funding. As a result, members cannot buy materials or organize activities such as theatre shows and science exhibitions. Moreover, the lack of suitable rooms and equipment makes it difficult to hold regular meetings. Another challenge is time. Because of the heavy timetable and homework, students can hardly attend club sessions. In addition, some clubs have no trained supervisor, so students do not get enough guidance. I would therefore be grateful if you could consider giving each club a small budget, a fixed room and a regular slot in the weekly timetable. I am sure these steps would help students enjoy their clubs and learn more from them. Thank you for your time and consideration. Yours faithfully, [Your name]
